How the level is set (fixed rule, applied in order; counts only, no prediction). A "restriction item" is a moratorium, zoning amendment or siting ordinance for the selected sectors (or for energy facilities generally). "Enactment" means adopted, extended or rescinded in our documents, or a Moratorium Nation record.

1. *Active at the site*: a pending restriction item, or an enactment in the last 12 months, at a government with land-use jurisdiction over the site (its city, village, township or town, or its county).
2. *Active nearby*: otherwise, 3 or more other governments within the radius with a pending restriction item or an enactment in the last 12 months.
3. *Some nearby activity*: otherwise, 1 or 2 such governments, or only earlier-stage items (discussion, drafting, hearings) in the last 12 months.
4. *None recorded*: nothing of the above in our data. Read together with the coverage section.

Who decides siting in Michigan

- General information about state law as checked on Sep 29, 2026, not legal advice and not an assessment of this site. Thresholds, exemptions and pending legislation change; read the cited sources and consult counsel.
- Under Public Act 233 of 2023 (effective Nov 29, 2024) the Michigan Public Service Commission (MPSC) may issue siting certificates for solar of 50 MW or more, wind of 100 MW or more, and storage of 50 MW and 200 MWh or more (MCL 460.1222). [R3]
 - A local unit may adopt a “compatible renewable energy ordinance” (CREO), which may be no more restrictive than the Act’s standards (MCL 460.1221). [R4]
 - A developer may apply to the MPSC if the local unit misses its deadline, denies a CREO-compliant application, or tightens its CREO; a local unit may also ask the MPSC to require a state certificate (MCL 460.1223, 460.1222). [R5] [R3]
 - On May 7, 2026 the Court of Appeals (Almer Charter Township v MPSC) largely upheld the MPSC’s implementation of PA 233, which remains in effect. [R6]
 - 79 townships and counties applied for leave to appeal to the Michigan Supreme Court on Jun 18, 2026; we have not confirmed what has happened since. [R7]
 - There is no state siting process for data centers; they go through local zoning, and the Michigan Zoning Enabling Act generally bars a township from totally prohibiting a lawful land use (MCL 125.3207). [R8]
 - PA 207 of 2024 extends the data-center equipment sales and use tax exemption to 2050 (2065 on brownfield or former power-plant sites) with a Michigan Strategic Fund certificate; it is a tax law, not a siting law. [R9]

9. Methodology, limits and disclaimer

What this is. A snapshot of what Siting Radar holds on Sep 29, 2026 about local moratoria and siting rules affecting data centers, battery storage (bess), solar, wind near the site. Every factual line carries a citation to a stored public document (with page), a Moratorium Nation dataset row, a Census boundary or a monitored source; every quotation is checked, before delivery, to appear word for word in the text we stored for the cited page.

Governing jurisdictions are the governments whose Census TIGER/Line 2025 boundaries contain the site: the incorporated city or village if there is one, otherwise the township or town, plus the county. Boundary data are approximate at parcel scale; confirm the parcel's jurisdiction with the county auditor, assessor or GIS office.

Items are detected automatically in agendas, packets, minutes and legal notices by rules (and, where noted, a language model), then grouped per government, action and meeting date. Stage labels (discussion, hearing, adopted, ...) are the detector's reading of the text and can be wrong; the quotation and the cited page are the evidence. Items classified "other" (energy topics that are not a moratorium, zoning amendment, siting ordinance or project application) and items below the alert confidence threshold (0.5) are not shown. Items flagged wrong by our reviewers are removed. Matches below 0.7 confidence are labelled "lower-confidence match".

Dates are the meeting or document date an item refers to. For a codified ordinance, a packet or an ordinance book the date can be that of the document rather than of the vote; the cited page shows which.

Pending means a pre-vote stage whose meeting date is today or later. Governments often act at a meeting whose agenda is posted only days before; an empty pending list is not a guarantee.

Legal-notice text from statewide notice aggregators is not reproduced (their terms allow internal use only); we give our own one-line description and a link to the original notice.

Moratorium Nation records are third-party data, shown with attribution under CC BY 4.0 and matched to our registry by name, type and location.

Coverage. We monitor only governments whose agendas we found online; section 8 lists what we watch for the site's governments and how much of the radius is covered. Governments without an online agenda source can act without appearing here.

State siting. Depending on the state and the project, a state body (Michigan Public Service Commission (Public Act 233 of 2023 siting) [\[R2J\]](#)) or state law can permit, certify or limit some projects and can limit or override local rules for them; section 2 summarises who decides siting in Michigan as of Sep 29, 2026. Whether local rules apply to a particular project is a legal question for counsel.

The activity level is the fixed rule shown in section 1 applied to the counts in this report. It is not a probability, a forecast of any vote, or an opinion about whether a project can be permitted.

Not legal advice. This report is information extracted from public documents and third-party data. It may be incomplete, out of date or wrong, and it does not interpret any ordinance. Read the cited sources, confirm with the local government, and consult counsel before relying on it.
